F. P. Incropera y D. P. DeWitt. Fundamentos de transferencia de calor y masa. Prólogo de Carlos L. García-de-la-Talavera y Antonio L. García-Maya. Co-ayudante: Juan F. Rodríguez. Cuarta ed. del Profesor José A. Leon (Instituto de Matemática Aplicada de Sevilla). Aprobado por examinadores: Juan A. Morales y Marcelo Ramírez. Transferencia de calor y masa - 3a ed. - Fundamentos de transferencia de calor y masa. by JL Ramirez Fundamentos de transferencia de calor y masa - de la segunda edición al tercera. by JL Ramirez by JL Ramirez Category:Heat transfer Category:Fluid dynamicsAromatase activity is regulated by estrogen receptor alpha in neuronal PC12 cells. Estrogen action on the developing central nervous system is mediated by estrogen receptor alpha (ERalpha). There is accumulating evidence that aromatase, the enzyme that converts C19 steroids to estrogens, may be an additional target for ERalpha. The identification of aromatase in the central nervous system suggests a role for aromatase in the development of neurons. To evaluate the possibility that ERalpha controls the expression of aromatase in neuronal cells, we studied the effect of estradiol and estradiol plus ERalpha on aromatase activity in the neuronal PC12 cell line. The effect of estradiol was dose-dependent and was blocked by the antiestrogen ICI 182,780. When the cells were cotransfected with an ERalpha expression vector, the cells responded to estradiol in the same manner as the parental cells, i.e., ERalpha expression resulted in an increase in aromatase activity. We conclude that ERalpha regulates the expression of aromatase activity in neuronal cells.Question of the Day Should Trump keep Pence on the ticket in 2020? MIAMI (AP) - Miami would need to change city ordinances to keep Omar Mateen and other gun offenders from buying guns, such as a short-barreled rifle and a pistol. 2d92ce491b
