I just created this forum to help unlock the Developer mode. On Monier Life and Xentry I tried out the full version on the hand of a friend of mine in order to unlock the developer mode. But it took a while and things got stuck, so I had to ask for help on this wonderful community. I also tryed doing it with a computer where no in game updates were done, and no Steam or Origin installed. This also proved to be difficult. But I don't think this is possible if you have a computer which is connected to the internet. If anybody else knows a way to unlock this mode, please contact me in private.
