M. J. Frisk M. J. Frisk, (born Oct. 30, 1939, Chicago, Ill.), American physicist who was one of the first to study the stellar energy generation mechanism that now bears his name. He obtained his B.S. and Ph.D. degrees in 1962 and 1964, respectively, from the University of Illinois and became a member of the faculty there, first as assistant professor and then as associate professor. In 1978 he became professor of physics at the California Institute of Technology and director of its Center for Science and International Affairs. He is the author of *Physical Principles of Phase-Transition Electric-Resistance Phenomena* (1978) and coauthor of *Confinement Physics in Condensed Matter* (1990) and, with B. Widom and E.K.R. Green, *Thermal Conductivity of Liquids, Gases, and Fluids* (1993). See also *Energy Generation and Power Displays*; G. H. Hardy; Goldston, Leon; Heisenberg, Werner; H. S. Leff; T. Padmanabhan; R. H. Packard; *Positive Phenomena and Phase-Transition Phenomena*; P. W. Atkins; P. de Haas; P. de Leeuw; S. Levy; *Thermodynamic and Transport Phenomena*. Citation styles Encyclopedia.com gives you the ability to cite reference entries and articles according to common styles from the Modern Language Association (MLA), The Chicago Manual of Style, and the American Psychological Association (APA). Within the "Cite this article" tool, pick a style to see how all available information looks when formatted according to that style. Then, copy and paste the text into your bibliography or works cited list. Because each style has its own formatting nuances that evolve over time and not all information is available for every reference entry or article, Encyclopedia.com cannot guarantee each citation it generates. Therefore, it's best to use Encyclopedia.com citations as a starting point before checking the style against your school or publication's requirements and the most-recent information available at these sites: Modern Language Association The Chicago Manual of Style American Psychological Association Notes: Most online reference entries 2d92ce491b
