A: I'd like to warn you in advance: the answer is yes, this is a duplicate, and I'm not happy about it. You're basically asking the same question in two different ways, and in both cases I'm not satisfied with the answer. What I'm trying to say is: "Hey. I'm doing a research on the folding patterns of paper and I want to analyse the data". "You should probably ask a different question, because the one you're asking now is basically the same thing, but in a much different way, with no actual value to the community" What should you ask in this case? You're asking for a paper that's out of date. There's no need to ask how paper folding patterns have been analysed since the year 2220. Just ask how they were analysed in the year 2020. I would still give a brief introduction (say 1-5 sentences) how the research has been conducted, even if you have no intention to continue. This is to avoid giving the impression that you're asking about outdated research and it's trying to replicate a study that's out of date. You're asking for the results of a survey in a database, and you don't know how the database is made. That's not a great idea, because it makes it impossible for other people to replicate the results. Make sure you ask a question that actually has value for
